

BIORABIES® Protecting what you love most

Vaccinating dogs and cats with **BIORABIES®** saves lives!

The evolution of animal health

Rabies, a global threat.

Did you know that rabies kills one person every nine minutes around the world?

Rabies generates **+59,000 human deaths per year**

1 person dies every **9** minutes in the world because of rabies

95% of these deaths occur in **Africa and Asia**

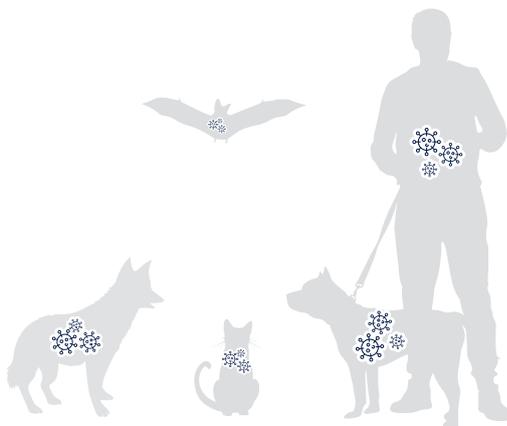

80% of these fatalities happen in rural areas

99% are caused by dog bites

Rabies is **100%** preventable

Rabies is a deadly viral disease that affects the brain and nervous system of mammals, including dogs, cats, and humans. While it is fatal once symptoms appear, rabies is entirely preventable through timely vaccination and proper medical care.

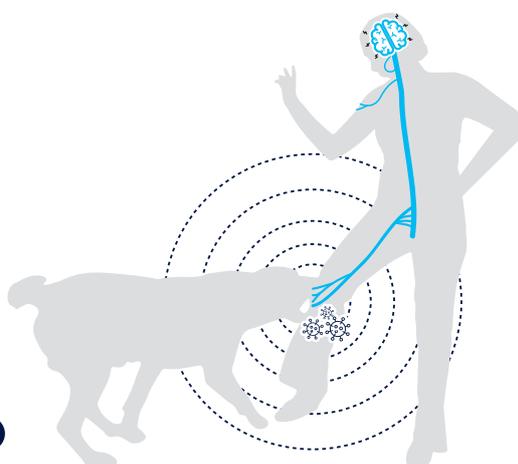

Virus enters salivary glands and other organs of victim **5**

Virus reaches brain and causes encephalitis **4**

Virus ascends spinal cord **3**

Virus moves up peripheral nervous system to CNS **2**

Virus enters tissue from saliva of biting animal **1**

Rabies is a zoonotic and fatal disease, rabies kills.

BIORABIES®

The trusted rabies vaccine for your beloved pets.

A safe, high-quality inactivated vaccine that offers proven protection for up to 12 months in both dogs and cats after a single dose.

Antibody titers determined by Elisa Platelia Rabies II kit and expressed as ELISA Units (EU)

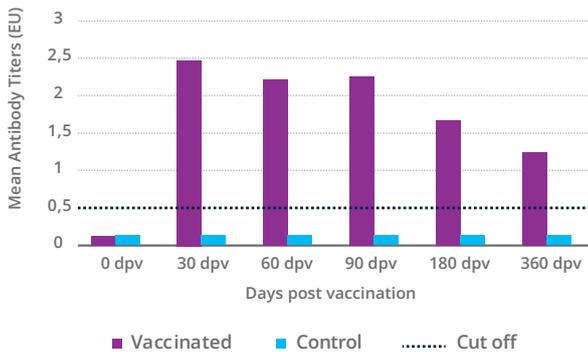

Figure 1 shows average antibody titers in dogs at different days post-vaccination with BIORABIES® (Batch 002/08) for vaccinated and control groups, at 0, 30, 60, 90, 180 and 360 dpv.

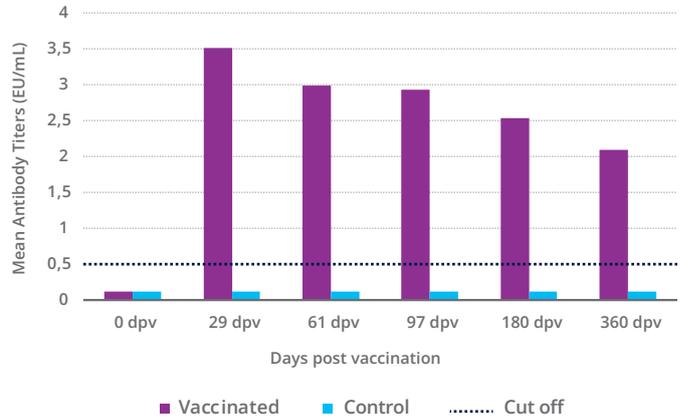

Figure 2 shows average antibody titers in cats at different days post-vaccination with BIORABIES® (Batch 079) for vaccinated and control groups, at 0, 29, 61, 97, 180 and 360 dpv.

BIORABIES® Guidelines

A High-potency and safety rabies vaccine.

Indication:

Prevention of rabies in dogs and cats.

Composition:

Suspension of rabies virus, PV strain, cultured in BHK cells and inactivated by BEI.

Dosage and Administration:

Administer 1 mL subcutaneously. The vaccine is safe for dogs and cats from 7 weeks of age. Revaccinate annually or as directed by local authorities during rabies vaccination campaigns. The timing of the first dose may vary depending on national regulatory guidelines.

Storage:

Store refrigerated between +2°C and +8°C. Do not freeze.

Precautions:

The colour of BIORABIES® is pink. If the colour of the vaccine changes to orange or yellow, it should not be used.

Warnings:

- Some animals may develop a small lump at the injection site, which usually disappears without medication.

- As with any biological product, vaccination may rarely cause a hypersensitivity reaction.

- In the event of anaphylaxis, adrenaline, corticoids and/or antihistamines should be administered as advised by the veterinarian.

Protect your pet. Protect your family.

Biogénesis Bagó
